THE EARLY LEARNING COMPLIANCE PLATFORM

Simpler early learning centre management. More time for who matters: children.

One simple platform for your day, your team, your centre and for who matters most: your children.

Running an early learning centre means using a lot of systems applications and tools to manage and account for...

... **CHILDREN.** Families. Educators. Rosters. Ratios. Fees. Training. Observations. Records. Policies. Compliance.

And when you're already busy, the last thing you need is another system to manage.

Safekeeping brings it all together in one place. It helps you run the day more simply, keep your team connected and stay on top of what needs attention, while quietly building the evidence behind the work you're already doing.

With Safekeeping, it's less chasing. Less double handling. More time for what matters.

Everything is in one place. One view. One login. A much easier day.

Most centres use a collection of different tools; an app for families, a system for fees, a roster somewhere else, documents in folders, training records in spreadsheets. The information is all there. It's just not always connected or it's just not always the whole view.

Compliance that works in the background. Your day creates the evidence. Safekeeping connects it.

Here's where Safekeeping is different.

It wasn't built by adding compliance onto an existing childcare system. Safekeeping was built from the ground up around the evidence behind your education and care so the work you already do becomes part of the bigger picture.

That means the things your team already does becomes useful evidence.

- A sign-in.
- An observation.
- A roster.
- A training record.
- A family message.

You don't have to do the work twice. Safekeeping is doing it for your service-delivery and compliance in the background. It connects everyday activity to the standards it supports, helping you build a clearer picture of your service as you go.

Safekeeping brings your day together.

FOR APPROVED PROVIDERS & OPERATIONAL MANAGERS

See every service in your organisation through one connected view in a single platform while allowing each centre to work in the way that suits them.

FOR CENTRE DIRECTORS & CENTRE MANAGERS

Get a clearer picture of your centre, using just one platform for information and the priorities for your day.

- See your team, families, fees and records in one place.
- Quickly see what needs attention.
- Find information when you need it.
- Spend less time chasing paperwork.
- Keep your centre organised and effecient.
- Confidence in preparedness for a visit by an assessor.

FOR EDUCATORS

Let everyday tasks happen naturally as part of the day. Embed tasks seamlessly into the day.

- Sign-ins
- Observations
- Family updates
- Records
- Everyday evidence

You only have to do it once. Safekeeping connects the dots with a child all day.

Know where you stand – all the time. Not just at assessment and rating visit times.

Nobody wants to spend the weeks before an assessment and rating visit trying to work out what evidence is missing.

Safekeeping gives you a more continuous view of what's happening across your service so you can spot gaps and risks early and deal with them while they're still manageable.

It helps you:

- See what's going well
- Spot what needs attention
- Know what to focus on first
- Connect evidence to the standards it supports
- Keep up with changing requirements

And there's an important difference...

Safekeeping doesn't make decisions for you. It doesn't tell you that you're compliant, report to regulators or take responsibility away from your team.

It simply gives you a clearer view so the decisions that matter stay with you and your team.

Safekeeping fills the information gaps identified by a number of early learning inquiries.

Safekeeping has been designed to intuitively ensure every child's safety and learning, priorities for all approved providers and services.

Safekeeping tracks a child's daily patterns and maps it back to 'one view' for centre management and staff.

Purposely built with a 360-degree view of early learning centre service needs. Your centre. Your state. Your requirements.

Early learning has national standards, but every state has its own requirements too.

Safekeeping is designed to understand those differences.

Set your service location and the platform can reflect the requirements that apply to you, including relevant screening checks, child safe standards and reportable conduct requirements.

If you operate across several states, each service can work to its own requirements while you still have one clear view across your organisation.

And when requirements change, Safekeeping keeps pace.

See how good you are. And show it.

Your team is already doing great work every day.

Safekeeping helps make that work visible.

By connecting everyday practice to the standards it supports, you can see where you're strong and where you might need to focus. So when assessment time comes, you're not buried in paperwork trying to piece everything together.

You can walk in knowing where you stand and show the work your team is already doing.

Getting started is simple.

Switching systems shouldn't become another job. Choose the approach that suits your early learning service.

---

1. UPLOAD WHAT YOU HAVE

Best for: services wanting to get started quickly

Drop in your existing policies, registers, rosters, training records and QIP.

Safekeeping reads and maps them so you can quickly see where you stand.

---

2. IMPORT YOUR CURRENT SYSTEMS

Best for: services ready to move their whole day across.

Bring across your children, families, staff, enrolments and billing using simple exports from your existing systems

---

3. LET US HANDLE IT

For provider groups and busy teams, our team can manage the migration and connections for you.

And the best thing, your centre keeps running as normal while you make the move.

Safekeeping. For the people who care.
Run the day. Keep the evidence.
Stay in control.

Built by people who understand what's at stake.

Safekeeping is from Protego AI Labs, a privately owned Australian company.

The team has spent years working in environments in which safety and quality are critical.
Early learning
Disability support
Aged care
Energy
Critical infrastructure

They've seen what happens when the rules aren't followed and how that impacts those receiving the service and those providing it.

Safekeeping was built to bring higher standards to early learning. It brings a centre's day and the evidence behind it together, helping the people who care for children keep the promises they've made to families.

Protego AI Labs: Winner — People's Choice Queensland Government Launch AI 2026.
